QUOTATION #130286.1	Courthouse CCTV system
--------------------------------	-------------------------------

04/10/14

Dear Karen:

Per your request, we will provide 17 cameras on the 1st floor of the building. We will provide the cameras, the headend rack, the two (2) 16-channel DVRs, and the headend wire terminations. You or your electrician will need to mount the cameras, provide and install the conduit and CAT6 cable to each camera and terminate the wires at the cameras. You will also need to provide any ladders or lifts that we will need to make final camera adjustments.

As part of the first phase, we will provide a rack in the basement phone room with the DVRs, camera power supplies, and small UPS to power the DVRs and exterior cameras during a power outage. Each 16-channel DVR will have 6Tbytes of internal storage to provide 60 days of storage at 4CIF (hi-resolution), hi-quality, at 7.5 images per second with motion recording. You or your EC will need to provide a 120VAC circuit.

You will need to provide a PC suitable for the Bosch remote viewing client and provide network cabling from the DVRs to your county network. We have not included pricing for conduit, wire, installation, or field terminations required, making this a complete, working system. We will terminate the camera wires at the headend and program the DVRs' parameters.
