## DISTRICT 5 LOCAL ROADS PROCESS REVIEW

*Cathy Johnson*  
COUNTY CLERK  
VERMILION CO. IL.

### 2023-13 Construction and Materials Management System (CMMS)

The Construction and Materials Management System (CMMS) is an accounting system used to document contract and materials assignment for the accounting of highway moneys. CMMS replaces the MISTIC system to enhance documentation of all projects using State or Federal Funds.

The improved system is available for both State-Let and Local-Let construction projects. It provides an accounting system that complies with Section 4-101.9, 4-1-101.12 of the Highway Code (605 ILCS 5/4-101.9 and 605 ILCS 5/4-101.12).

Efficiency in using CMMS is gained using standards of performance of road and bridge construction. This is accomplished using pay items prescribed in the Standard Specifications for Road and Bridge Construction using the unique assigned number for data processing known as the *IDOT Coded Pay Items*. All Local-Let projects shall include IDOT Coded Pay Items along with the Pay Item name with its listing of quantities with the applicable unit of measure.

District Implementation Support, Materials, and Local Roads staff will be available to assist in training on the use of CMMS.

Beginning **August 1, 2023**, all Local Let construction projects will use CMMS for the accounting of State funds.

Kensil A Garnett  
Region 3 Engineer
