

## Vermilion County Board - Aug 8, 2023

It's obvious that we need to bring in some teenage 4H's who practice and compete in Parliamentary process, to help record what people say at Board Meetings.

**FILED**

Because there is so much, never recorded - even of the board members.

**AUG 08 2023**

It's been an interesting year so far. What, with the "Little-Lady" affair and the Turbine treachery - Vermilions have been entertained and betrayed on a grand scale.

*Cathy Johnson*  
COUNTY CLERK  
VERMILION CO. IL.

It started with a bulldog board member, who was attempting to hold accountable a department head, pertaining to financial and management issues.

In conversation he used an "old" expression from his youth that apparently got some people's knickers in a knot, which triggered an entire cascade of silliness, I haven't seen since high school.

The Administrator in question, claimed harassment, refusing to participate in a public hearing about the department - thus halting public disclosure of the Department's operations.

Interestingly, both questions were highlighted in last months meeting, when you all voted to cover a large financial expense, because the department failed to file the necessary paperwork.

The harassment claim was taken up by one side of the political-duality scheme, who championed the harassment banner, in delivering a surprise proposal to the Board that would fundamentally change Vermilion County governance.

A proposal never seen by our Legal Council before that night and a surprise to everyone who was not part of the secret little clique.

A detailed legal document that no one seems to know who wrote?!

After failing miserably in the political caged-smack-down, they were able to leave the mangled legislative corpse on the table for later consumption.

All of this because someone who is an equal opportunity insulter that annoys everyone at some point, using his grumpy old man character, collided with a woke world, where being a victim is all the rage.

You can't make this stuff up!

## Vermilion County Board - Aug 8, 2023

But I must tip my hat to the incredibly smooth and well planned brotherhood operation, in assuring wind turbines cannot be challenged by the citizens.

It was very impressive indeed! Even bringing in extra hidden hands from outside to guide the locals. Your involvement is noted and your betrayal of Vermilions never to be forgotten.

Bringing in a Pritzker man to make sure all the legal-wiggle stuff aligned, was a nice touch... but the turbine committee was pure genius.

Creating an illusion that something was being done to protect us, a committee was formed, whose sole purpose was to make sure Vermilion County renewable ordnances, matched the State's.

A committee that held at least one (1) secret meeting, with no input from any qualified opposition, with you then breaking your arms patting each other on the back for what they did to us.

Politics today.. two (2) sides of the same coin, pulled from the masters pocket.

Who deny "us" the right to ask questions in board presentations, because truths can be so inconvenient for those who rule.

Shirley Knott
